### **DETAILED ACTION**

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by DD 4445546; 6/27/96. DE '546 teaches a composition comprising fatty ester Ia (instant fatty acid ester where  $n = 0$ ). DE '546 teaches compositions comprising fatty acid ester Ia in 12.5 and 300 ppm concentrations (page 6 line 53 – page 8 line 40). DE '546 teaches that the composition is applied to plants (page 6 line 53 – page 8 line 40).

Claims 10 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 00/02451; 1/20/00. WO '451 teaches a composition comprising Magic West fatty esters having 10 to 24 carbon atoms (instant fatty acid ester where  $n = 0$ ). WO '451 teaches compositions comprising fatty acid ester (Magic West) in 10, 100 and 150 ppm concentrations (abstract, page 7 1st full paragraph, Tables 6-10). WO '451 teaches that the composition is applied to plants (abstract).

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1616

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO '451 as applied to claims 10 and 22. WO '451 teaches all that is recited in claims 16 and 17 except for the composition comprising instant concentration of fertilizer or plant nutrient. However, WO '451 teaches that a fertilizer can be added to the composition (page 16). It would have been obvious to determine the optimum amount of fertilizer to include in the composition. One would have been motivated to do this in order to make a composition effective at promoting plant growth.
